

Turbo Manatee (TUMA)

Whitepaper v1.1 — Official English Edition

- BNB Smart Chain
- Decentralized Meme Token
- Community-Driven

1. Introduction

Turbo Manatee (TUMA) is a decentralized Meme token deployed on the BNB Smart Chain (BSC). This project is committed to redefining the value of Meme culture within the Web3 ecosystem, built upon the core principles of transparency, fairness, and community autonomy.

TUMA combines entertainment with a high-standard security architecture, allowing all participants to engage with confidence in a risk-free and transparent environment.

2. Vision & Mission

TUMA's vision is to build a transparent, highly engaging, global, and community-driven Meme ecosystem.

Its core objectives include:

- Establishing a reliable decentralized token free from developer control.
- Attracting global community participation through events, NFTs, and Web3 applications.
- Developing long-term utilities such as NFT collections, community tools, and interactive applications.
- Providing a transparent and secure environment through renounced ownership and publicly defined Tokenomics.

3. Smart Contract Information

Token Contract Address:

0xeD89776141b1A62ADfbf3c243b75600Eb2c4b430

Contract Deployer: 0x894ab58b1aeff8b79bc47af3897695092d23d5d2

Network: BNB Smart Chain (BEP-20 Standard)

4. Tokenomics

Category	Percentage	Amount	Description
Market Release	45%	45,000,000	Locked and gradually released into the market
Liquidity Pool	10%	10,000,000	Initial liquidity on PancakeSwap
Airdrop / Events	25%	25,000,000	Community events, rewards, and airdrops
Team/Development	20%	20,000,000	Locked for development and operational costs
Contract Pledge	0%	0	Ownership fully renounced

5. Ecosystem Development

The TUMA ecosystem will continue to expand in the following directions:

- NFT Collections — Official Turbo Manatee NFT series.
- Community Events — Airdrops, meme contests, and early supporter programs.
- Utility Tools — Community tools, informational dashboards, and future staking exploration.
- Multi-Chain Integration — Future plans include cross-chain compatibility and broader platform support.

6. Security Measures & Lock Mechanism

The TUMA framework prioritizes security and transparency above all else.

Key security features include:

- Ownership fully renounced — No developer privileges or centralized control.
- No blacklist, no taxes, no minting functionality.
- Verified smart contract with fixed and immutable supply.
- Risk-free trading logic aligned with the standard BEP-20 specification.

To ensure long-term stability, transparency, and market confidence for the Turbo Manatee (TUMA) ecosystem, a phased token lock has been implemented.

This locking strategy aims to reduce short-term volatility, prevent concentrated selling pressure, and demonstrate the team's long-term commitment to building the TUMA ecosystem.

— 一、Team & Development Lock (20%)

Locked Amount: 20,000,000 TUMA

Lock Duration: Until 2026/05/14 00:00

Wallet Address:

0x0743731352191ce861fa6aacda8067249e29775c

Lock Proof:

<https://www.pinksale.finance/pinklock/bsc/record/1386261>

— 二、Market Reserve Lock (45%)

Locked Amount: 45,000,000 TUMA

Lock Duration: Until 2026/02/14 00:00

Wallet Address:

0x8bbeda6c64168888036b12e3b9630febccf1680d

Lock Proof:

<https://www.pinksale.finance/pinklock/bsc/record/1386267>

The lock configuration ensures market stability and strengthens community confidence.

Roadmap

Phase 1 — Infrastructure

- Token deployment and launch
- Official website release
- Establishment of community channels (X, Telegram)

Phase 2 — Expansion

- Release of NFT collections
- Marketing and promotional campaigns
- Listing and exposure on DEX platforms

Phase 3 — Ecosystem Extension

- Ecosystem partnerships and brand collaborations
- Development of community tools and platform features
- Expansion into broader Web3 use cases and applications
